

Specification:

- Brand new
- Material: ABS (Acrylonitrile Butadiene Styrene)
- Size: approx. 130*45*15mm
- Cable length: approx. 142cm
- Voltage range: 1000V to 10,000V

Feature:

- Designed for low impedance and standard duty fence energisers.
- Highly visible lighting clearly indicating voltage usage level.
- Easy to use. Just insert the earth probe into the ground and slip the fence in the clip located at the back of the tester and you're ready to go.
- Durable in use.
- Great for daily fence maintenance, to locate fence faults and used to test the output voltage of the energizer.
