

Shield - Proto KIT

Product Overview

The Proto Shield Kit allows you to move your projects from the breadboard to on an Arduino-compatible PCB, with some detailed components, such as:

- 1 Straight single line pinhead connectors 40x1
- 1 Straight single line pinhead connectors 3x2
- 2 PCB Pushbutton
- 1 red led
- 1 yellow led
- 1 green led
- 5 10K Ohm Resistors 1/4W
- 5 220 Ohm Resistors 1/4W
- 5 1K Ohm Resistors 1/4W

On the Proto Shield PBC you'll find:

- ICSP header
- Led1 and Led2 headers (with resistor headers)
- S1 Button header
- SOIC prototyping area up to 14-pin SOIC chip, narrow medium or wide package.
- 10 bigger holes for special needs
- long and easy-to-solder ground / 5V rails
