

## ■ Features

- Fast response time
- High analytic
- Cut-off visible wavelength  $\lambda_p=940\text{nm}$
- High sensitivity
- Pb free
- This product itself will remain within RoHS compliant version.

## ■ Descriptions

The BPI-3C1-05 consist of an infrared emitting diode and an NPN silicon phototransistor, encased side-by-side on converging optical axis in a black thermoplastic housing .

The phototransistor receives radiation from the IRED only .This is the normal situation. But when an object is in between , phototransistor could not receives the radiation. For additional component information , please refer to IR and PT

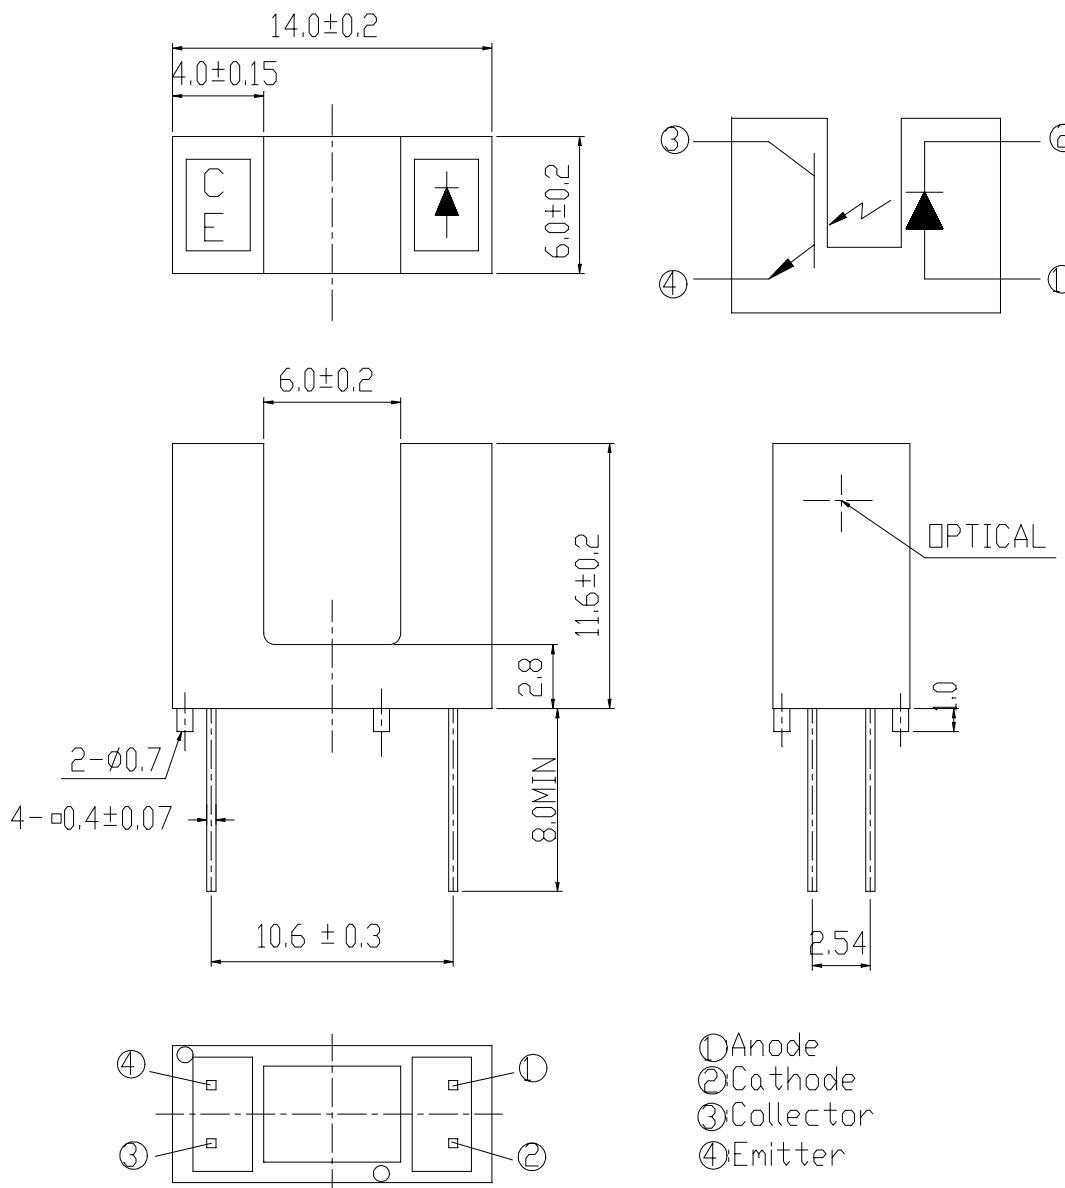

## ■ Applications

- Mouse Copier
- Switch Scanner
- Floppy disk driver
- Non-contact Switching
- For Direct Board

PT	Silicon	Water Clear

## ■ Package Dimensions

### Notes:

1. All dimensions are in millimeters
2. Tolerances unless dimensions  $\pm 0.2$  mm
3. Lead spacing is measured where the lead emerge from the package
4. Above specification may be changed without notice. GUANGPUYUAN will reserve authority on material change for above specification
5. These specification sheets include materials protected under copyright of GUANGPUYUAN corporation . Please don't reproduce or cause a consent
6. When using this product , please observe the absolute maximum ratings and the instructions for use outlined in these specification sheets. GUANGPUYUAN assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets.
