

# MOULDED CASE CIRCUIT BREAKER

***ADM7-100S/ADM7-250S***

***ADM7-400S/ADM7-630S***

## DESCRIPTION / APPLICATION

The ADM7 range moulded case circuit breaker will provide protection for the circuit and equipment in case of overload, short circuit and under voltage condition occurred in the power distribution circuit. Besides, it can also provide protection of overload, short circuit and under voltage for the non-frequent start of motor.

It is in conformity with IEC 60947-2 standard.

## Normal Working Condition

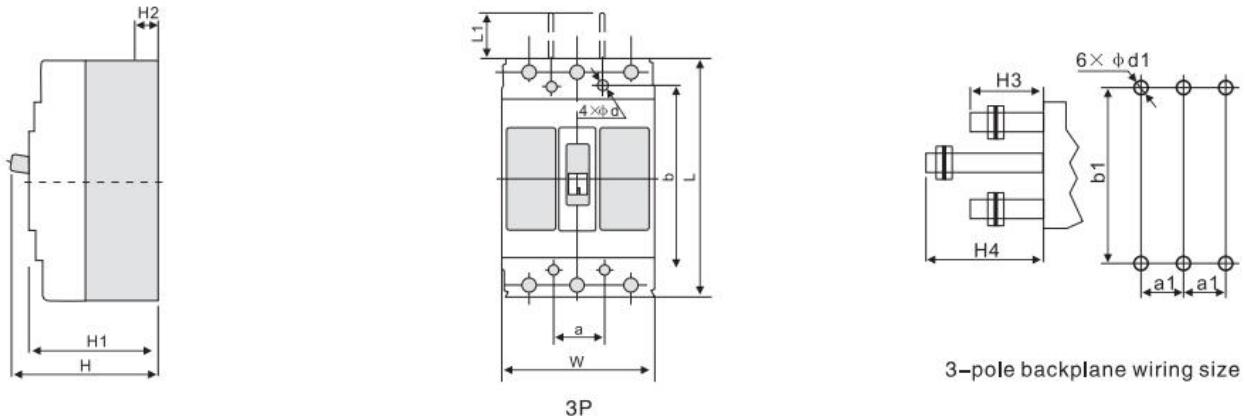

1. The ambient air temperature is  $-5^{\circ}\text{C} \sim +40^{\circ}\text{C}$ .
2. The altitude of the installation site does not exceed 2000m.
3. Tolerance to damp air.
4. Withstand the effects of nuclear radiation.
5. The maximum inclination is  $22.5^{\circ}$ .
6. It can work reliably under normal vibration of ship.
7. Under earthquake conditions (4G) can work reliably.
8. In non-explosive medium, and the medium is free of gases and conductive dust sufficient to corrode metal and destroy insulation.
