

Product Name: One in four out of the water solenoid valve

Scope of Application: All kinds of water consumption of household appliances and industrial equipment water inlet control.

Model type: DCF-4PA G3/4

Operating Conditions

Operating Voltage: DC12V

Applicable Fluid: Tap water, 0 ~ 55°C (no freezing)

Working Pressure: 0.02~ 0.8Mpa

Basic Performance

1. Flow Performance: 0.5-15 L/min
2. Starting Performance: 0.02~0.8MPa rated voltage 100% can start;
3. Water Pressure Resistance: 2MPa pressure for 5 minutes, no leakage, damage
4. Insulation Resistance: Under DC500V voltage, the insulation resistance is greater than 100MΩ
5. Insulation Grade: F
6. Durability: Under the rated voltage and rated frequency, at room temperature, it is a cycle with power on for 5S and power off for 5S, the water pressure is 0.02 ~ 0.8Mpa, a total of 50,000 cycles, the valve can work normally after the test.
7. Salt spray resistance test performance: 48 hours without corrosion.

Size of water intake: 6 points outer pipe thread

Size of water outlet: Φ12mm

Product size: 118×101×86 mm

Carton Packing: 40PCS/BOX
