KE0080 & 81 keyestudio Super Learning Kit for Arduino

Introduction:

Keyes basic starter kit includes various sensor components, modules, breadboard wires, development board and so on, which is very popular for electronic learners. We also provide you with more detailed learning projects of this kit based on the development board, including wiring methods, test code and so on. Helping you to have a preliminary understanding of those electronic components and keyes development board.

NOTE: KE0078 Kit Includes UNO R3; KE0081 KIT Includes MEGA 2560.

Project List:

Project 1: Blinking an LED
Project 2: Breathing an LED
Project 3: Simulating Advertising Light
Project 4: Button-Controlled LED
Project 5: Making a Responder
Project 6: Controlling LED Brightness
Project 7: Photosensitive Light
Project 8: Active Buzzer
Project 9: Passive Buzzer
Project 10: Flame Alarm
Project 11: A Cup with Temperature Indicator
Project 12: Magical Light Cup
Project 13: IR Remote Control Decoding
Project 14: 1-digit LED Display
Project 15: 74HC595 Driving LED Display
Project 16: 8*8 Dot Matrix Display
Project 17: 4-digit LED Display
Project 18: 1602 LCD Display
Project 19: RGB Module Display
Project 20: Ultrasonic Rangefinder
Project 21: 1302 Clock Display
Project 22: PIR Motion Sensing
