

## Sn99.3Cu0.7

**Product model:** Sn99.3Cu0.71.

2. Low melting point and stability
3. Tidiness surface and not easy to bond
4. Non-flux pollution
5. No dross residual
6. Nontoxic and environment friendly

### Introduction:

1. It passed the SGS test completely.
2. In the dust-free and environment-friendly workshop, high-purity environmental protection tin ingot and special flux formula are used,
3. Strictly implement ISO quality management system,
4. Using German direct reading spectrometer to control the quality of the products and manufacture lead-free solder wire in line with ROHS standard.

### Parameters:

Sn%	Melting Point °C
99,3	231,9 °C
