

FIXED VOLTAGE REGULATOR

LM79LXX

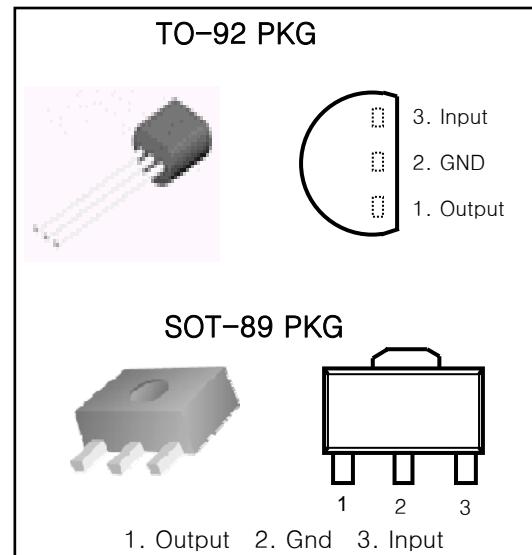

3-Terminal 0.1A Negative Voltage Regulators

FEATURES

- Output Current Up to 100mA
- No External Components
- Internal Thermal Overload Protection
- Internal Short-Circuit Limiting
- Output Voltage of 5V, 12V, 15V, 18V and 24V.
- Moisture Sensitivity Level 3

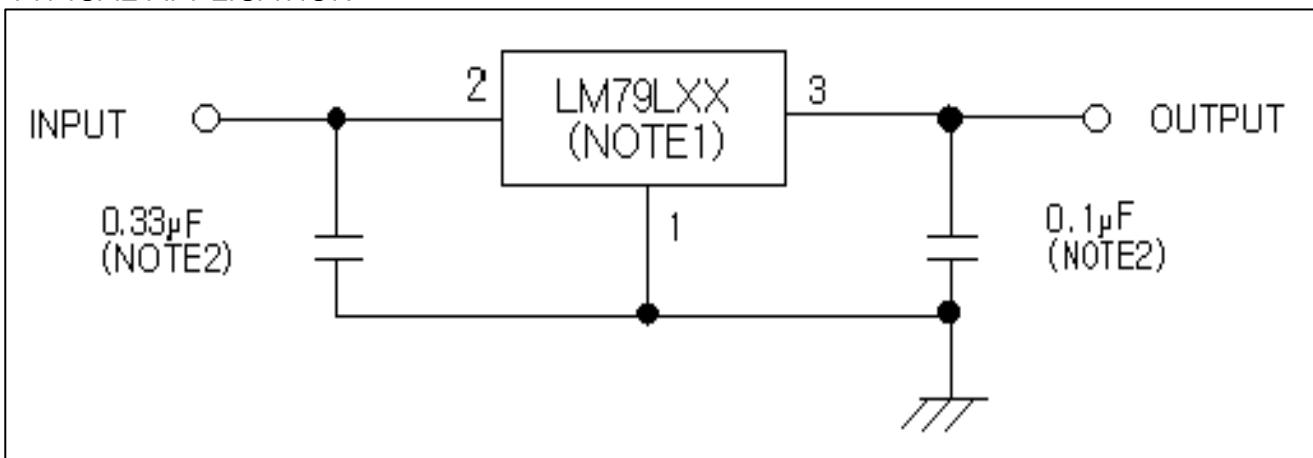

DESCRIPTION

This series of fixed-voltage monolithic integrated-circuit voltage regulators is designed for a wide range of applications. These applications include on-card regulation for elimination of noise and distribution problems associated with single-point regulation. In addition, they can be used with power-pass elements to make high current voltage regulators. Each of these regulators can deliver up to 100mA of output current. The internal limiting and thermal shutdown features of these regulators make them essentially immune to overload. When used as a replacement for a zener diode-resistor combination, an effective improvement in output impedance can be obtained together with lower-bias current.

ORDERING INFORMATION		
Device	Marking	Package
LM79LXX	LM79LXX	TO-92
LM79LXXF	LM79LXX	SOT-89

TYPICAL APPLICATION

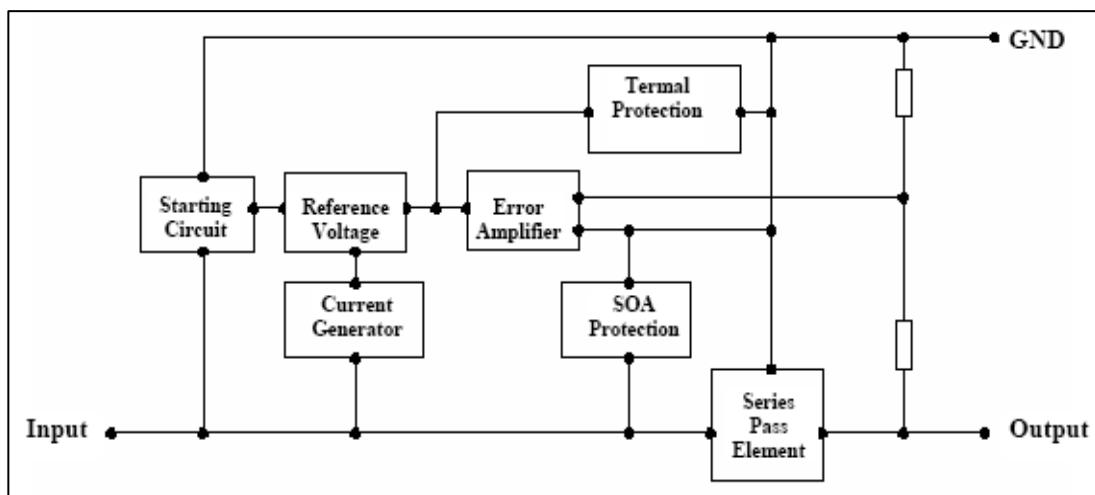

Notes

1. To specify an output voltage, substitute voltage for "XX"
2. Bypass capacitors are recommended for optimum stability and transient response and should be located as close as possible to the regulators.

FIXED VOLTAGE REGULATOR

Output noise voltage	V_N	10Hz ≤ f ≤ 100kHz	25°C		42		μV	
Ripple rejection	RR	-8V ≤ V_i ≤ -18V $f=120Hz$	25°C	41	49		dB	
Dropout voltage	V_D		25°C		1.7		V	

Notes

- *. Pulse testing techniques are used to maintain the junction temperature as close to the ambient temperature as possible.

Thermal effects must be taken into account separately.

All characteristics are measured with a $0.33\mu F$ capacitor across the input and a $0.1\mu F$ capacitor across the output.

- **. This specification applies only for DC power dissipation permitted by absolute maximum ratings.

LM79L06 ELECTRICAL CHARACTERISTICS
