

SIFAM KNOBS

Collet knobs

The collet knob design features a nut tightening chuck which tightens onto all pot shafts, with or without flats. Moulded in black nylon with satin-matt finish, this well known range of knobs offers various finishing and accessory options. Sifam's range is very extensive, but the types usually relevant to the pro-audio industry are stocked. The various caps and accessories all push fit onto the basic knob. Stock types are with white line on body, and with or without radial white or black line on cap.
