

SensoPlus® Screwdrivers

These screwdriver handles are ergonomically designed to give fatigue-free, comfortable working.

They have dual compound handles with soft-grip inserts allowing substantially improved grip, and therefore screw turning torque.

The blades are made from toughened high alloy steel for excellent wear resistance, and the torque performance is 20% over the international standard requirement. The tips are precision machined for true screw fit. All these features are why C.K. SensoPlus are the professional's choice.

49012 Phillips screwdriver
